IMPORTANT LEGAL AND TECHNICAL INFORMATION REGARDING THE SELECTION AND CONFIGURATION OF YOUR MOTORHOME

Each motorhome is only approved for a certain maximum weight on the road, which must not be exceeded under any circumstances when driving. When you select and configure your motorhome or van (hereinafter referred to as: "motorhome"), the technical and legal limits for the weight of the motorhome are therefore extremely important. These play a decisive part in the configuration, particularly when the additional equipment is being selected (equipment packages, special equipment and options).

The technical and legal requirements for the weight of your motorhome are regulated in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). This applies uniformly within the European Union. In order to make it easier for you to select and configure your motorhome in compliance with the legal and technical requirements, we will explain the key terms and requirements of this regulation and give you some information that is extremely important for configuring your vehicle and selecting your additional equipment (equipment packages, special equipment and options) from the items that are available from the factory. Please read this information carefully before configuring and ordering your vehicle. Our dealers will provide you with additional assistance in selecting and configuring your motorhome.

1. TECHNICALLY PERMISSIBLE GROSS VEHICLE WEIGHT

The technically permissible gross vehicle weight describes the maximum permissible weight, based on the layout, that your motorhome is allowed to weigh when laden (e.g. 3,500 kg, 4,500 kg) as specified by the manufacturer. This is entered in Part I of the registration certificate. You can find information about the technically permissible gross vehicle weight for each layout in the technical data which is shown in our sales documents (e.g. in the price lists).

Illustration in the price list:

COMPACT COMFORT		
		
	Compact	
	540 DB	600 LE
Chassis	Fiat Ducato 35 light	Fiat Ducato 35 light
Base engine	Diesel 2.2 l (140 hp / 103 kW)	Diesel 2.2 l (140 hp / 103 kW)
Length / width / height (mm)***	5,410 / 2,100 / 2,590	5,990 / 2,100 / 2,590
Wheel base (mm)	3,450	4,035
Headroom in living area (mm)	1,900	1,900
Technically permissible gross vehicle weight (kg) ⁵²⁾	3,500	3,500 / 4,000*
Mass in running order (kg) ⁷⁾	2,735 (2,598 - 2,872)	2,845 (2,703 - 2,987)
Maximum weight of additional equipment fitted as standard, as specified by the manufacturer (kg) ⁵¹⁾	415	297
Max. towing capacity (kg) ¹⁵⁾	2,500	2,500
Max. number of seats with 3-point safety belt while driving ⁵⁰⁾	4	4

The technically permissible gross vehicle weight (e.g. 3,500 kg) must not be exceeded under any circumstances while driving. If the vehicle exceeds the technically permissible gross vehicle weight while driving, this constitutes a regulatory offence which may be punishable with a fine. We therefore urgently advise you to check this before each journey and ensure that you and your vehicle do not exceed the technically permissible gross vehicle weight (e.g. 3,500 kg).

2. MASS IN RUNNING ORDER

The mass in running order corresponds to the (unladen) weight of the vehicle with standard factory equipment (including lubricants, tools, tyre repair kit and a fuel tank that is 90% full) plus a statutory default weight of 75 kg for the driver.

The mass in running order essentially includes the following items:

- the unladen weight of the vehicle with the habitation including filled operating fluids such as lubricating grease, oils and coolants;
- the standard equipment, i.e. all equipment items which are included in the vehicle within the scope of delivery;
- a fresh water tank that is 100% full when driving (filling when driving in accordance with the manufacturer's specifications. You will find the manufacturer's information about filling the vehicle in the sales documents (e.g. in the price lists). This is 20 l or 50 l depending on the model range) and an aluminium gas bottle that is 100% full, weighing 16 kg;
- a fuel tank that is 90% full;
- the driver, whose weight is set at a flat rate of 75 kg, regardless of the driver's actual weight.

The mass in running order is therefore the basic configuration of the vehicle model you have selected with standard equipment plus a statutory flat rate weight of 75 kg for the driver. This changes after selecting additional equipment (equipment packages, special equipment, options).

You will find information about the mass in running order for each layout in our sales documents (e.g. in the price lists).

It is important that the value given in our sales documents for the mass in running order is a standard value which is determined during the type approval procedure and checked by the authorities. It is legally permissible and possible for the mass in running order of the vehicle which is delivered to you to differ from the nominal value specified in the sales documents due to production-related tolerances. The legal tolerance is $\pm 5\%$. The EU legislator has taken into account the fact that there are certain fluctuations in the mass in running order due to fluctuations in the weight of the supplied parts as well as process and weather-related factors. Please take this into consideration when selecting and configuring your motorhome.

Example calculation illustrating these (permissible) production-related weight deviations:

Mass in running order according to sales documents:	2,900 kg
Legal tolerance of $\pm 5\%$:	145 kg
Legally permissible range of mass in running order:	2,755 to 3,045 kg

The specific range of permissible weight deviations for the mass in running order for each layout can be found in the technical data shown in our sales documents. As a manufacturer, we endeavour to restrict weight fluctuations to the minimum that is unavoidable in terms of production technology. Deviations above and below within the legally permissible tolerance range therefore only occur very rarely. However, in spite of constant technical optimisation of the production process, these cannot be completely avoided.

In order to ensure that all of the vehicles which are actually delivered comply with the legally permissible tolerance, the actual weight of the vehicle and compliance with the permissible tolerance of $\pm 5\%$ is checked by us as the manufacturer by weighing the vehicle upon completion in the production area at the end of the production line. Your dealer will inform you of the actual weight of your vehicle that was measured at the end of the production line. This gives you full transparency about any weight discrepancies that may be present in your vehicle.

3. NUMBER OF MAXIMUM PERMITTED SEATS / WEIGHT OF PASSENGERS

The maximum number of permitted seats while driving is determined by us as the manufacturer during the type approval procedure. The weight of the passengers results from the maximum number of permitted seats. The weight of the passengers is a flat rate of 75 kg for each approved seat which we as the manufacturer have provided for the vehicle, regardless of what the passengers actually weigh. This is also a legally prescribed calculation. Since the weight of the driver is already included in the mass in running order, i.e. 75 kg (see section 2.), this is not taken into consideration in the weight of the passengers. In a motorhome with four approved seats, the weight of the passengers is $3 \times 75 \text{ kg} = 225 \text{ kg}$.

The specification of the maximum permissible number of seats in the sales documents refers to the respective vehicle weight in a standard set-up without additional equipment (for additional equipment, see section 4.) and specifies the maximum possible number of persons who can be seated while driving.

However, the number of seats depends on the weight and axle load. For example, it can be reduced by installing additional equipment (e.g. by selecting equipment packages, special equipment and options) or, depending on the model, only be achieved by increasing the permissible total weight and/or by omitting additional equipment.

4. ACTUAL WEIGHT AND ADDITIONAL EQUIPMENT

The mass in running order (see section 2.) and the weight of the factory-installed additional equipment (equipment packages, special equipment, options) in a specific vehicle are collectively referred to as the actual weight of the vehicle.

You can find information about the actual weight of your vehicle after it has been handed over in section 13.2 of the Certificate of Conformity (CoC), which will be given to you by your dealer when the handover takes place.

Please note that the actual weight which is specified in the Certificate of Conformity (CoC) is also a standard value. Since the mass in running order – as part of the actual weight – has a legally permissible tolerance of $\pm 5\%$ (see section 2.), the actual weight can deviate from the specified nominal value accordingly.

According to the legal definition, the so-called additional equipment includes all optional equipment parts that are not included in the standard equipment and is fitted to the vehicle by the manufacturer (i.e. ex works) and can be ordered by the customer (e.g. awning, bicycle or motorcycle rack, satellite system, solar energy system, oven etc.). Information about the individual or package weights of the equipment packages, special equipment and options which can be ordered can be found in our sales documents. Other accessories that are retrofitted after delivery of the vehicle from the factory by the dealer or by you personally are not included in the special equipment in this sense.

5. MAXIMUM WEIGHT OF ADDITIONAL EQUIPMENT SPECIFIED BY THE MANUFACTURER AND PAYLOAD

Since the installation of additional equipment is also subject to legal and technical limits, we determine the value of the maximum weight of additional equipment which can be fitted to the vehicle in addition to the standard equipment (e.g. by selecting equipment packages and/or special equipment) for each layout and vehicle. This value must not be exceeded when you are selecting and configuring your vehicle.

The weight of additional equipment specified by the manufacturer can be found in our sales documents (e.g. in the price lists).

For motorhomes, the European legislation prescribes a fixed minimum payload, which must remain for luggage or other accessories which are not installed in the factory. This minimum payload is calculated as follows:

Minimum payload in kg $\geq 10 * (n + L)$

In this calculation: "n" = maximum number of passengers plus the driver and "L" = total length of vehicle in metres (including decimal places).

For a motorhome with a length of 7 m and 4 approved seats (including the driver), for example, the minimum payload is $10 \text{ kg} * (4 + 7) = 110 \text{ kg}$.

When you are configuring your motorhome, please note that the payload must not fall below the minimum.

To ensure that the minimum payload is adhered to, there is a maximum combination of additional equipment which can be ordered for each vehicle model. In the above-mentioned example with a minimum payload of 110 kg, the total weight of additional equipment for a vehicle with four approved seats (including the driver) and a mass in running order of 2,900 kg should be a maximum of 265 kg:

3,500 kg	Technically permissible gross vehicle weight
- 2,900 kg	Mass in running order
- 3 x 75 kg	Weight of passengers
- 110 kg	Minimum payload
= 265 kg	Additional equipment

COMPACT | COMFORT

	Compact	
	540 DB	600 LE
Chassis	Fiat Ducato 35 light	Fiat Ducato 35 light
Base engine	Diesel 2.2 l (140 hp / 103 kW)	Diesel 2.2 l (140 hp / 103 kW)
Length / width / height (mm)***	5,410 / 2,100 / 2,590	5,990 / 2,100 / 2,590
Wheel base (mm)	3,450	4,035
Headroom in living area (mm)	1,900	1,900
Technically permissible gross vehicle weight (kg) ⁵²⁾	3,500	3,500 / 4,000*
Mass in running order (kg) ⁷⁾	2,735 (2,598 – 2,872)	2,845 (2,703 – 2,987)
Maximum weight of additional equipment fitted as standard, as specified by the manufacturer (kg) ⁵¹⁾	415	297
Max. towing capacity (kg) ¹⁵⁾	2,500	2,500
Max. number of seats with 3-point safety belt while driving ⁵³⁾	4	4

The maximum weight of additional equipment specified by the manufacturer is intended to ensure that the legally prescribed minimum payload is also actually available for the vehicle payload after delivery of a vehicle by the manufacturer. This means that only a certain amount of additional equipment can be ordered and installed in the factory, in order to leave a sufficient weight allowance available for luggage and other accessories (the so-called payload) without exceeding the technically permissible gross vehicle weight.

The payload is calculated by subtracting the mass in running order (nominal value according to the sales documents, see section 2.), the weight of passengers (see section 3.) and the maximum weight of additional equipment specified by the manufacturer from the technically permissible gross vehicle weight (see section 1).

Please note that this calculation is based on the standard value for the mass in running order determined during the type approval process, without taking account of the permissible weight deviations for the mass in running order (see section 2.). If the maximum permissible value for the additional equipment of (in this example) 265 kg is almost or completely exhausted, an upward weight deviation in the mass in running order may therefore result in the minimum payload of 110 kg being theoretically maintained using the standard value of the weight in running order, but in reality there is no corresponding payload option.

Here is another sample calculation for a vehicle with four approved seats, whose actual mass in running order is 1% above the nominal value:

3,500 kg	Technically permissible gross vehicle weight
- 2,929 kg	Actual mass in running order of the vehicle (+ 1% compared to the 2,900 kg specified in the sales documents)
- 3 x 75 kg	Weight of passengers
-265 kg	Weight of additional equipment
= 81 kg	Actual payload (< minimum payload of 110 kg); in this example, the minimum payload is therefore undershot by 29 kg

In order to avoid such a shortfall in the minimum payload, the manufacturer reduces the weight of the additional equipment that can be ordered based on the layout. Limiting the additional equipment is intended to ensure that the minimum payload, i.e. the legally prescribed weight available for luggage and other accessories, is actually achieved for the payload of the vehicles delivered by the manufacturer.

As, due to production reasons, the actual weight of the specific vehicle is only determined when it is weighed at the end of the production line, it cannot be completely ruled out that in rare exceptional cases a situation may arise, whereby the minimum payload is not guaranteed at the end of the production line despite this limitation of additional equipment. In order to guarantee the minimum payload in these cases, the manufacturer will check with you and your dealer before delivery of the vehicle whether, for example, the vehicle is overloaded, the number of permitted seats is reduced or additional equipment is omitted to reduce the weight, so that you receive a vehicle that has the legal minimum payload. The weight of additional equipment offered by the manufacturer can be found in our sales documents (e.g. in the price lists).

The additional weight of additional equipment (all equipment parts not included in the standard equipment) increases the actual weight of the vehicle (= mass in running order plus the selected additional equipment) and reduces the payload. The specified value indicates the additional weight compared to the standard equipment of the respective layout. The total weight of the selected additional equipment (equipment packages, special equipment and options) must not exceed the maximum weight of additional equipment specified by the manufacturer.

6. THE EFFECTS OF MASS IN RUNNING ORDER TOLERANCES ON THE PAYLOAD

Regardless of the minimum payload, you should also note that unavoidable production-related fluctuations in the mass in running order have an effect on the remaining payload:

if you order our example vehicle (see section 5.) with additional equipment with a total weight of 150 kg, the calculated payload is 225 kg based on the default value for the mass in running order. Due to the tolerances, the payload that is actually available may deviate from this value and may be higher or lower. If the mass in running order of your vehicle is about 1% higher than the weight specified in the sales documents, the possible payload is reduced from 225 kg to 196 kg:

3,500 kg	Technically permissible gross vehicle weight
- 2,929 kg	Actual mass in running order of the vehicle (+ 1% compared to the 2,900 kg specified in the sales documents)
- 3 x 75 kg	Weight of passengers
- 150 kg	Ordered additional equipment for the specifically configured vehicle
= 196 kg	Actual payload

to ensure that the calculated payload is actually achieved, you should therefore take into account the possible and permissible tolerances in the mass in running order when selecting and configuring your vehicle. We also strongly recommend weighing the laden motorhome on a non-automatic weighbridge before every journey and determining whether the technically permissible gross vehicle weight and the technically permissible total axle load are adhered to, taking account of the individual weight of passengers.

MALIBU VAN COMPACT

OUR EVERYDAY CAMPER WITH SHORT VEHICLE LENGTHS OF UNDER 6 METRES

A flexible all-rounder, perfect for use in the city and ideal as a second car. Maximum comfort in an extra-short vehicle length thanks to clever, compact room layout.

540 DB, 600 LE models

Compact kitchen

84-litre compressor refrigerator in galley kitchen

Space-saving compact bathroom

Low bed access height of just 64 cm (540 DB)

Large linen cupboard / wardrobe

Two style ranges

Available as an option with pop-up roof family-for-4

MALIBU VAN COMFORT

THE KING OF COMFORT

Added comfort thanks to the refrigerator at a comfortable grip height. Maximum kitchen comfort with additional worktop and shelf space, as well as extra-wide kitchen drawers. Refrigerator in separate, ceiling-high multi-purpose cabinet. With universal wardrobe underneath, and additional wardrobes under the rear bed.

600 DB, 640 LE models

Comfort kitchen including worktop extension

70-litre compressor refrigerator positioned at a convenient height for easy access

XL "1000" flexi-bathroom

Wardrobe with up to 100 cm internal height

Large, versatile rear storage space

Two style ranges

Available as an option with "Charming" exclusive line

Available as an option with pop-up roof family-for-4

"Charming" exclusive line

EXCLUSIVE LINE

EXCLUSIVE MODELS AVAILABLE ASCOUPÉ OR GT SKYVIEW VERSION WITH EXCLUSIVE "CHARMING" EQUIPMENT

Available for Malibu Van Comfort, Diversity, First Class - Two Rooms

GT Skyview: Omission of overhead storage cabinet, replaced with fabric-covered ceiling panel extending from the cab to above the lounge seating area **coupé:** Overhead storage cabinet omitted; instead, continuous microfibre climate-regulating lining extending into the cab, with indirect ambient lighting and a practical shelf above the cab

- Chassis Plus package as standard
- Additional exterior decal with globe symbol and "Charming" lettering
- Faux leather steering wheel and gear lever knob, premium dashboard. Chrome ventilation grille, 16-inch alloy wheels, automatic air conditioning, inductive mobile phone charging tray, digital instrument cluster, electric handbrake, bumper in body colour, black skid plate, fog lights
- LED ambient lighting upgrade: Indirect ambient lighting on driver's and passenger's sides, LED ambient lighting on double floor at lounge seating area
- Technical panel in entrance area
- Malibu Connect iNetX including colour display with "Touch" function, Bluetooth and app control

MALIBU VAN DIVERSITY

A VERSATILE CAMPER VAN WITH AN XL KITCHEN COMFORT AND SPACIOUS INTERIOR

Spacious feel with loads of room to move and open lines of sight XL comfort kitchen with high-performance 84-litre compressor refrigerator in separate universal multi-purpose cabinet, extra-large worktop and shelf spaces, as well as extra-wide and deep kitchen drawers with clever storage space concept.

600 DB K, 640 LE K models

More room to move

XL comfort kitchen with extra-large worktop

84-litre compressor refrigerator in universal cabinet

XL "1000" flexi-bathroom

Large wardrobe below rear bed

Two style ranges

Available as an option with "Charming" exclusive line

Available as an option with pop-up roof family-for-4

MALIBU VAN FIRST CLASS - TWO ROOMS

INNOVATIVE LAYOUT WITH UNIQUE TWO-ROOM CONCEPT AND SPACIOUS FEEL

Amazing feeling of space with loads of room to move. Multifunctional washroom with partition door to living area and dressing room function. Dressing room extension thanks to washroom wall that swings inwards.

640 LE RB model

Premium kitchen

Two-room concept with partition door

84-litre compressor refrigerator at front side of kitchen

Universal high cabinet

XL "1000+" flexi-bathroom with dressing room function

Large wardrobe / linen cupboard under rear bed

Two style ranges

Available as an option with "Charming" exclusive line

Available as an option with pop-up roof family-for-4

Pop-up roof family-for-4

FAMILY-FOR-4

POP-UP ROOF

FOUR FULL-SIZED SLEEPING BERTHS WITH POP-UP ROOF IN UNIQUE HYBRID CONSTRUCTION

Available for Malibu Van Compact, Comfort, Diversity, First Class - Two Rooms

- "Protect" GRP roof covering to shield the pop-up roof from hail and external damage
- Four full-sized sleeping berths with a sleeping area of 203 x 135 cm in the pop-up roof
- Malibu PREMIUM window in washroom for adequate ventilation (not 540 DB, 600 LE models)
- Front roof spoiler as standard to minimise wind noise (not GT Skyview version)
- Hybrid pop-up roof made of a high-stability sandwich construction (GRP/RTM hard foam/aluminium and plastic design elements on sides)
- Low self-weight of just 105 kg
- Rain gutter above sliding door
- Also available in conjunction with "Charming" exclusive line (Coupé or GT Skyview)
- Dual USB socket in hybrid pop-up roof
- Mini Heki skylight in hybrid pop-up roof available as an option

MORE OF EVERYTHING AS STANDARD

HUGE STORAGE SPACE WITH EASY ACCESS

- Large storage compartment in double floor at lounge seating area with floor hatch and high-quality hinges
- Large storage drawers at front of bench seat with additional storage space inside bench seat
- Large wardrobes in all models
- Accessible rear storage space thanks to fold-up beds on both sides

BEST TRAVEL AND LIVING COMFORT IN THE VAN CLASS

- Large kitchen worktop thanks to flush-mounted, fold-up worktop extension and multifunctional, flush-mounted sink cover including chopping board
- XL "1000" flexi-bathroom with huge shower cubicle that can be divided off thanks to the swivel-away toilet
- Extra-large bed surfaces with high-quality cold foam mattress for outstanding sleeping comfort

PREMIUM FINISH AND FIRST-CLASS FURNITURE CONSTRUCTION

- Extensive body insulation measures: Floor panel and ceiling panel with RTM hard foam insulating core
- Side walls and body frame members lined with polyurethane insulating foam mats to prevent thermal bridging
- Malibu premium window with surrounding frame and double seal system for rain and water spray protection
- Microfibre, climate-regulating lining on interior walls and ceiling – for optimal insulation and prevention of creaking noises while driving
- Modern interior window trim for side window in the lounge seating area and rear window
- Furniture with double connection technology: Furniture is screwed together and mortised
- High-quality, robust metal hinges and clasps

Additional legal and technical information regarding vehicle weights / mass in running order tolerance

- 7) In accordance with EU Implementing Regulation No. 2021/535, the mass in running order corresponds to the (unladen) weight of the vehicle with factory-installed standard equipment (including lubricants, tools, tyre repair kit) plus driver (75 kg), 90% full fuel tank, fresh water tank when driving (20 l), 100% full aluminium gas bottle. The weight of additional equipment specified by the manufacturer is basically dependent on the mass in running order, and is reduced by installing additional equipment (equipment packages, special equipment). Please note that the actual weight which is specified in the Certificate of Conformity (CoC) is also a standard value. Since the mass in running order – as part of the actual weight – has a legally permissible tolerance of $\pm 5\%$, the actual weight can deviate from the specified nominal value accordingly. Detailed information can be found on page 3, no. 2.
- 15) Towing capacity 2,500 kg taking the total towing weight into consideration, chassis version f35 6,000 kg and f40 6,500 kg.
- 50) The specification of the maximum permissible number of seats refers to the respective vehicle weight in a standard set-up without additional equipment, and specifies the maximum possible number of persons who can be seated while driving. The number of seats also depends on the weight and the axle load. It can therefore be reduced if additional equipment (equipment packages, special equipment) is installed, or it may only be achieved if the vehicle load is increased. Detailed information can be found on page 4, no. 3.
- 51) The maximum weight of additional equipment specified by the manufacturer must not be exceeded during the selection and configuration of your vehicle. The maximum weight of additional equipment specified by the manufacturer is intended to ensure that the legally prescribed minimum payload is also actually available for the vehicle payload after delivery of a vehicle by the manufacturer. This means that only a certain amount of additional equipment can be ordered and installed in the factory, in order to leave a sufficient weight allowance available for luggage and other accessories (the so-called payload) without exceeding the technically permissible gross vehicle weight. Detailed information can be found on page 5, no. 5.
- 52) The technically permissible gross vehicle weight describes the layout-based maximum permissible weight specified by the manufacturer that your motorhome is allowed to weigh when loaded (e.g. 3,500 kg, 4,500 kg). The technically permissible gross vehicle weight (e.g. 3,500 kg) must not be exceeded under any circumstances while driving. Detailed information can be found on page 3, no. 1.

General

- 2) Smart TV with receiver and DVB-T2 tuner (USB, HDMI, full HD). TV position above lounge seating area on bathroom wall. Omission of designer shelves above lounge seating area if 24" Smart LED TV option chosen.
- 3) Considerably more difficult to retrofit.
- 4) Kitchen upgrade: worktop extension, divided sink cover with chopping board. 600 DB, 640 LE models with wall bracket. 640 LE RB model: without worktop extension.
- 5) Fiat Ducato f40 option, including 16-inch steel rims.
- 7) In accordance with EU Implementing Regulation No. 2021/535, the mass in running order corresponds to the (unladen) weight of the vehicle with factory-installed standard equipment (including lubricants, tools, tyre repair kit) plus driver (75 kg), 90% full fuel tank, fresh water tank when driving (20 l), 100% full aluminium gas bottle. The weight of additional equipment specified by the manufacturer is basically dependent on the mass in running order, and is reduced by installing additional equipment (equipment packages, special equipment). Please note that the actual weight which is specified in the Certificate of Conformity (CoC) is also a standard value. Since the mass in running order – as part of the actual weight – has a legally permissible tolerance of $\pm 5\%$, the actual weight can deviate from the specified nominal value accordingly. Detailed information can be found on page 3, no. 2.
- 8) When selecting the driver assistance package, there is a cut-out for the camera casing in the cab blind system where the camera is positioned (top centre).
- 9) Child seats with restraint systems must not be installed on the passenger's seat.
- 10) Removable double floor in rear storage space with limited bearing load (surface load) of max. 95 kg.
- 11) The optional lithium-ion battery replaces the gel battery/batteries. Battery status indicator, accessible via free app for Android and iOS and touch display.
- 12) The charge booster is incorporated between the alternator and the starter/habitation battery, ensuring that the alternator generates power during travel until the batteries are charged.
- 13) In adverse conditions, manual readjustment of the air conditioning system may be necessary.
- 14) 8-speed torque converter automatic in f35 only possible in conjunction with 16-inch steel wheels or 16-inch alloy wheels.
- 15) Towing capacity: 2,500 kg taking the total towing weight into consideration (chassis version f35 6,000 kg and f40 6,500 kg), bearing load: 120 kg, max. load-bearing capacity: 75 kg (e.g. bike rack), tow bar with removable ball head. Only in conjunction with tow bar preparation.
- 16) In conjunction with family-for-4 package: The standard skylights above the seating area and in the washroom are omitted. Hybrid pop-up roof only possible in conjunction with PREMIUM WINDOW option in washroom (except in compact models). Not possible in conjunction with seating area to sleeping berth conversion kit, pre-wiring for solar system or pre-wiring for satellite system option. In 540 DB and 600 LE models, there is a forced ventilation system on the passenger side (LHD).
- 17) Position of holding clips for awning crank in DB models: above rear storage space; LE models: in rear storage space, awning housing: aluminium antracite. Side wall awning only available in conjunction with optional LED light strip on awning.
- 18) The specified fresh water tank volume already includes the volume of the boiler.
- 19) In the basic configuration when calculating the mass in running order, only "one" 100% full aluminium gas bottle at 16.5 kg is taken into consideration. The "DuoControl CS with crash sensor" option (automatic changeover and de-icing function) can in principle also be operated with one connected gas bottle. When connecting and using a second gas bottle, the remaining load capacity of your vehicle will be reduced by 16.5 kg if an aluminium gas bottle is used. Steel gas bottles are around 5 kg heavier.
- 20) Porthole window option: In the 640 LE, 640 LE K, and 640 LE RB models, only one window on the driver's side (LHD) can be opened. In the 600 DB and 600 DB K models, the windows on the driver's side (LHD) cannot be opened. Porthole window not in conjunction with Malibu premium window on passenger side (LHD) in rear bed area. 640 LE / 640 LE RB / 640 LE K models: Porthole windows replace the standard Malibu PREMIUM WINDOW on the passenger side (LHD).
- 21) 2.2 l, 4-cylinder engine: 140 hp engine: 350 / 380 Nm, 160 hp engine: 400 Nm, 180 hp engine: 450 Nm.
- 24) Socket package option: 2 x dual USB-C sockets in the sleeping area on the driver's and passenger side (LHD), 1 x 230 V socket under the rear bed directly in front of the storage space (and thus accessible from living area and rear storage space), 1 x dual USB-C socket / 1 x 230 V socket in the bench seat.
- 25) Additional 80 Ah on-board gel battery option recommended for all models.
- 26) Additional battery recommended.
- 27) Radio/moniceiver with touchscreen in cab, Bluetooth, monitor function for optional reversing camera and USB interface for connecting portable devices. Not available in conjunction with the Fiat multimedia system or mirror-integrated aerial.
- 30) Analogue reversing camera only in conjunction with Pioneer Radio. Only in conjunction with reversing camera preparation. Digital reversing camera only in conjunction with Fiat 10.1" multimedia system.
- 31) Mounted on back of kitchen.
- 32) Malibu table and chair set option, consisting of two camping chairs including Malibu logo, carry bags and a table.
- 33) The collision braking system automatically triggers braking in the event of a collision in order to prevent or lessen the effects of a possible secondary collision.
- 34) Mirror-integrated aerial; speakers in cab (2x) and lounge seating area (2x).
- 35) Malibu sleeping environment & soft furnishings set consisting of one or three decorative cushions (depending on model), a jacquard bed throw with woven Malibu logo and a fitted sheet set for the rear bed of the respective model. A fitted sheet set is not supplied for the optional cushion insert. It is recommended to order the gas filter in conjunction with the Truma DuoControl CS option, since the manufacturer of the Truma DuoControl invalidates the warranty if the gas pressure regulator and valves become defective or damaged because of oil or other foreign materials in the liquid gas.
- 37) Only available in conjunction with side wall awning option.
- 38) In conjunction with the pop-up roof family-for-4 package in the 600 LE / 600 DB / 600 DB K models, the standard Mini Heki skylight in the rear area is replaced with a Micro Heki skylight. In 540 DB model, the Mini Heki skylight in the rear area is omitted.
- 39) State-of-the-art multimedia system with 10.1" display, Bluetooth connectivity with audio streaming and hands-free function, smartphone integration via Android Auto or Apple CarPlay, USB interface for connecting portable devices; roof aerial.
- 40) Digital instrument cluster with colour display for optimal pairing with the Fiat 10.1" multimedia system for display of 3D navigation maps and driver assistance systems.
- 42) With the extended sleeping area option, a pull-out step is added to the entrance step for the rear bed.
- 44) Not available in conjunction with the Fiat 10.1" multimedia system.
- 45) In conjunction with the Fiat 10.1" multimedia system, no separate reversing camera pre-wiring is available. This means that it is considerably more difficult to retrofit a reversing camera.
- 46) Dual USB-C socket in pop-up roof is only available in conjunction with the socket package.
- 47) Not available in conjunction with pop-up roof family-for-4 package as this already contains a rain gutter.
- 59) Recommended for 540 DB model.
- 61) Only available in conjunction with a detachable tow bar. Includes two carrier rails. Total bearing load 66 kg.
- 68) Cab air conditioning system and Jehnert premium sound system options both excluded. Only one option can be chosen. Cab air-conditioning system only possible in conjunction with the socket package. Jehnert premium sound system available from 01/2026, Teleco cab air-conditioning system available from 10/2025.
- 72) Available from 11/2026. The iNet X Connect remote module lets you use the iNet X app while you are on the move. Connected devices can be controlled conveniently from a distance and status information can be viewed without having to be near the vehicle. An eSIM is required for use and is already included in the scope of delivery.
- 73) As standard on all Charming models. Optional for all other models.
- 74) Available from 10/2026. The level sensor is attached magnetically to the base of the bottle. The fill level is measured by ultrasound and displayed on the panel/app via Bluetooth connection. An additional clamping plate is required for use with an aluminium gas bottle. (Not included in the scope of delivery.) The sensor is not suitable for plastic gas bottles, refillable gas bottles, gas tanks or butane gas bottles. The scope of delivery includes one sensor.
- 75) Option includes padded wedge. The seat can only be fitted on the window side. Available from 10/2026.

General notes

- The price information shown includes the legally applicable rate of VAT of 20% and excludes shipping and transport costs.
- Some vehicles are shown with special equipment, which is available at extra cost.
- This information is subject to price, design and equipment modifications and also errors. The details relating to scope of delivery, appearance and performance comply with the status at the time of printing.
- If our suppliers change product designations during the season, we reserve the right to deliver a part type of equivalent value.
- Price, dimensions and weights subject to change. The current rate of VAT at the time of delivery shall be valid. All prices are non-binding recommended prices ex works. In the case of price adjustments by sub-contractors or chassis manufacturers, the prices will be modified accordingly.
- Mattress sizes can differ from the specified bed dimensions.
- The installation of optional extras can result in loss of storage space.
- The mounting of solar energy and satellite systems depends on the available roof area.
- Any change to the factory condition of your vehicle can negatively affect driving quality and roadworthiness.
- Any structural alteration to the vehicle renders liability claims void. The same applies if the customer makes changes to the paintwork/colour of body components.
- Some special equipment cannot be installed in all models. Your Malibu dealer will be happy to inform you about installation and technical details for your desired model.
- Prices for optional extras apply to ex works installation (not retrofitting). These extras must be ordered in good time before the vehicle goes into production. For information on this, please contact your Malibu dealer directly.
- Deviations from the textures and colours in the illustrations are permitted in as far as they are due to the nature of the materials used and/or are usual in the trade. The same applies to technical changes to the vehicle as long as the overall product quality remains the same or is improved, and the intended use is not affected.

- It is possible that inferior-quality clothing can leave marks on the seat covers. This means that the seat covers are discoloured or the dye from the fabrics rubs off. We do not accept any liability for this kind of discolouration.
- We recommend always using Malibu accessories and having them installed in our factory. We do not accept any liability for damage caused by products that are not approved by Malibu or by non-permitted modifications. This applies in particular to the installation of parts by workshops that are not authorised by Malibu. You should therefore always have repairs or retrofits carried out by authorised Malibu dealers and insist on genuine Malibu accessories.
- The water supply system complies with the state of the art in accordance with DIN 2001-2.

When this price list is published, all previous price lists lose their validity. Changes may occur during the model year after the editorial deadline for this printed document in July 2026. The manufacturer reserves the right to make structural and design changes that become necessary, provided that they are in the interest of technical progress and are reasonable for the customer, plus changes to equipment, differences in colour combinations or individual colour shades, material quality differences and changes to the scope of delivery on the part of the manufacturer. This also applies to colour differences on the chassis, insofar as they are a result of changes made by the chassis manufacturer. Please consult your dealer for detailed advice concerning the status of the current product or series.

The information relating to the scope of delivery, appearance, performance, dimensions and weights of the vehicles (differences within the scope of the factory tolerances (+/- 5% max.) are possible and permissible) corresponds to the available knowledge at the time of going to print. Reprinting of this document, or even extracts thereof, is only permitted if written authorisation is obtained from Malibu GmbH & Co. KG beforehand. The information in this publication is compliant with the German StVO and StVZO (road traffic and road traffic licensing regulations). Mistakes, printing errors and translation errors excepted. All information is based on the characteristics of the German market.

All prices listed in this price list are non-binding recommended retail prices (RRP) and include the statutory VAT applicable in the country of delivery, but exclude shipping and transport costs. Final pricing is at the sole discretion of the individual dealer. For this reason, please contact your dealer in advance. The prices stated in this price list do not constitute a binding offer. Subject to changes and errors.
